

REMARKS

Claims 1 and 8 are pending in this application. Claim 8 has been amended to eliminate the reference to an ultrasound emitter as a source of narrowband, electrochromatic radiation, overcoming the rejection under 35 USC 112, second paragraph, without agreeing with the Examiner's position. Specifically, an ultrasound emitter puts out both electromagnetic radiation in a limited bandwidth in addition to mechanic waves. The mechanical waves, however, result from the wavelength of the electromagnetic waves produced. Therefore, in accordance with applicant's teaching of a narrowband source of electrochromatic radiation, this non-broadband source of radiation emits radiation having a limited bandwidth and is, therefore, a narrowband source.

Further, by this amendment claims 10 are withdrawn without prejudice or disclaimer, to enable claims 1 and 8 to pass to issue.

All claims are, therefore, in condition for allowance and a notice thereof is earnestly solicited.

In the event that the transmittal letter is separated from this document and the Patent and Trademark Office determines that an extension and/or other relief is required, applicant petitions for any required relief including extensions of time and authorizes the Commissioner to charge

the cost of such petitions and/or other fees due in connection with the filing of this document to **Deposit Account No. 03-1952** referencing docket no. **509582000221**. However, the Commissioner is not authorized to charge the cost of the issue fee to the Deposit Account.

Respectfully submitted,

Dated: March 22, 2005
